A Centre of Excellence in Science and Technology by the Catholic Archdiocese of Trichur

B. TECH CURRICULUM - 2026

(AUTONOMOUS)
CREATING TECHNOLOGY
LEADERS OF TOMORROW
ESTD 2002

Semester I to VIII

Department of Computer Science and Engineering

Branch Code: CS

Recommended by BoS on 10/10/2025

Approved by Academic Council on 27/11/2025
(Reference: JEC/CS/2025/BoS/MOM/-02,
JEC/2025/AC/MOM/02/AC/02/A2)

SE	Skill Enhancement Courses.

VISION & MISSION OF THE INSTITUTION

VISION: To be a global leader in education, nurturing ethical professionals, fostering holistic excellence and sustainable societal impact.

MISSION

- Excellence in Education: Provide outcome-based and industry-relevant education that builds technical competence, innovation, and lifelong learning.
- Ethics and Values: Inspire integrity, empathy, and social responsibility to develop ethical and service-oriented professionals.
- Research, Innovation, and Entrepreneurship: Encourage creativity, research, and entrepreneurship for sustainable technological and economic growth.
- Holistic and Global Development: Promote all-round development, leadership, and global competence through collaboration and community engagement.

VISION & MISSION OF THE DEPARTMENT

VISION: To be a global leader in Computer Science & Engineering education, nurturing ethical innovators who advance technology for sustainable societal impact.

MISSION

- Provide outcome-based, industry-relevant education that builds strong computing fundamentals and lifelong learning skills.
- Foster ethical values, integrity, and social responsibility among future computing professionals.
- Promote research, innovation, and entrepreneurship to address emerging technological and societal challenges.
- Encourage holistic development, leadership, and global collaboration through academia–industry–community engagement.

PROGRAMME EDUCATIONAL OBJECTIVES

PEO 1	Graduates will apply strong foundations in mathematics, science, and computing to design innovative software and hardware solutions.
PEO 2	Graduates will excel as professionals, researchers, or entrepreneurs, adapt to rapid technological advancements and pursue higher education in reputed institutions globally.
PEO 3	Graduates will demonstrate ethical leadership, effective communication, and teamwork in multidisciplinary and global environments.

PROGRAMME SPECIFIC OUTCOMES

PSO 1	Apply machine learning models, cloud computing architectures, algorithms, and analytical methods to solve complex computational problems.
PSO 2	Design and develop software systems and applications by applying modern engineering tools, cloud and IoT platforms, and AI/ML frameworks to address real-world computational and engineering challenges.
PSO 3	Model and design computing applications, employing automate tools to ensure quality, ethical practice, and sustainable societal impact.

PROGRAMME OUTCOMES

PO1	Engineering Knowledge: Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop the solution of complex engineering problems
PO2	Problem Analysis: Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
PO3	Design/Development of Solutions: Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
PO4	Conduct Investigations of Complex Problems: Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8)
PO5	Engineering Tool Usage: Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
PO6	The Engineer and The World: Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7)
PO7	Ethics: Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
PO8	Individual and Collaborative Team work: Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
PO9	Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
PO10	Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.
PO11	Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

KNOWLEDGE AND ATTITUDE PROFILE (WK)

WK1	A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
WK2	Conceptually based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
WK3	A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
WK4	Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
WK5	Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
WK6	Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
WK7	Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
WK8	Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
WK9	Ethics, inclusive behavior and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

CUMULATIVE CREDITS

Cumulative credits for the entire B. Tech program is 170 credits

CREDIT ASSIGNMENT

4. HUMANITIES, SOCIAL SCIENCE AND MANAGEMENT

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S1/S2	J1HMP126	Life Skills and Professional Communication	TC	1
2	S3/S4	J1HMT346	Economics for Engineers	TC	2
3		J1HMT436	Engineering Ethics and Sustainable Development	TC	2
4	S7	J1HMT7N4 / J1HMM7N4	Elective (Project Management/Foreign Languages)	TC	2
5	S7	J1HMT705 / J1HMM7N5	Constitution of India. (MOOC)	TC	1
6	S8	J1HMT8N3	Organizational Behavior and Business Communication	TC	2
Total Credits					10

5. INDIAN KNOWLEDGE SYSTEM

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S5	J1IKT506	Indian knowledge system	TC	2
Total Credits					2

6. HEALTH AND WELLNESS

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S5	J1HWP126	Health and Wellness	TP	1
Total Credits					1

7. BASIC SCIENCE COURSES

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S1	J1BST111	Multivariable Calculus	TC	3
2	S2	J1BSP102	Physics for Information Science	TP	4
3	S1	J1BSP212	Chemistry for Engineers	TP	4
4	S2	J1BST211	Applied Linear Algebra for Computing	TC	3
5	S3	J1BST311	Probability and Stochastic Processes	TC	3
6	S4	J1BSP414	Graph Theory and Network Algorithms	TP	4
Total Credits					21

8. ENGINEERING SCIENCE COURSES

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S1	J1EST103	Programming in C	TC	4
2	S1	J1ESP104	Engineering Graphics and Computer-Aided Drawing.	TP	3
3	S1	J1ESP105	Fundamentals of Electrical & Electronics Engineering	TP	4
4	S1	J1ESL117	Programming in C Workshop	PL	1
5	S2	J1EST213	Python Programming	TC	3
6	S2	J1ESP214	Foundations of Computing: From Hardware Essentials to Web Design	TP	4
6	S2	J1EST205	Engineering Entrepreneurship & IPR	TC	2
7	S2	J1ESL228	Python Programming Workshop	PL	1
8	S3	J1EST325	Digital Electronics & Logic Design	TC	3
9	S6	J1EST603	Design Thinking and Product Development	TC	2
Total Credits					27

9. SKILL ENHANCEMENT COURSES / ADD ON COURSES

Sl.	Semester	Course Code	Course	Course Type	Credits
1	S1	J1SET109	Skill Enhancement Course	TC	-
2	S2	J1SET109	Skill Enhancement Course	TC	1
3	S3	J1SET309	Skill Enhancement Course	TC	1
4	S4	J1SET409	Skill Enhancement Course	TC	1
Total Credits					3
